## *Our story*

*Our story began with a passionate aspiring chiropractor named Börje Thuleskär. As he deepened his understanding of human anatomy and physiology, he became increasingly aware of how crucial sleep is for the body and the mind. So he invested in a new bed, the best the market had to offer. But his initial excitement quickly turned to disappointment, even the best fell short of his expectations.*

*One balmy summer day, Börje set sail for Stora Kornö, a small island off the Swedish west coast town of Lysekil. He explored the soft, rolling cliffs and crevasses along the shoreline. Then he spread his picnic blanket over an inviting bed of heather and lay down, basking in the sun and the surrounding natural beauty. And he was amazed at how comfortable he was. Stretched out on the heather, he was more relaxed and rejuvenated than when he was resting on his own premium bed.*

*That realisation sparked an idea. And that idea turned into a quest - to build the perfect bed, one that would mimic the feeling of weightlessness Börje had on the heather and capture the beauty of the island landscape.*

*Since Börje's day in the sun, we've  
spent thousands of hours refining  
his vision of the perfect bed.*

UNWIND

### *The Manifesto*

*To survive, we need air and water. Sleep is next on the list of essentials. But we live in a fast-paced society, one where sleep is grossly undervalued despite the physical and mental benefits. Carpe Diem Beds is making sleep a priority by transforming the bedroom into the heart of a healthy home. Our beautiful beds please the eye as much as the body. They make you feel weightless, immersing you in a tranquillity that relaxes both body and mind. They help revitalise each muscle and joint – as well as the mind and the spirit. And because a good night's sleep is vital to your wellbeing, they help you live your days to the fullest.*

## *Two hands crafting your bed*

EVERY CARPE DIEM BED IS MADE TO ORDER, AND ONE PERSON CRAFTS IT FROM START TO FINISH

Two experienced hands carefully nailing, sewing, placing, stretching, pinching, evaluating. Then proudly signing the bed when it's done. Once you've decided on the bed model, fabric, legs and headboard you want - your designated bed-maker will start building on your dream piece. That way you get exactly what you want without compromise. And you feel that sense of personal satisfaction when you see it standing proudly in your bedroom, and when you snuggle into it for your first rest. We're proud that we remain genuine, personal and dedicated. We've chosen to keep our production in Sweden. Here we stay in control of production and ensure quality. Here we keep our passion burning, and proudly champion the small town of Lysekil.

## *Materials*

EACH ELEMENT PLAYS AN ESSENTIAL PART IN MAKING YOUR BED SPECIAL

Every component is selected for its unique qualities, only allowing materials that are respectful to humans as well as the environment. It's evident in our bed frames crafted from solid, slow-growing Swedish pine as well as our mattresses with a Talalay latex core. It's in our selection of wool and cotton, and our exclusive fabrics brought in from known brands such as Designers Guild and The Romo Group.

## *Handmade in Sweden*

### SIGNED BY YOUR BED-MAKER

It takes guts - putting your name on something and publicly declaring it to be 'your work'. You truly have to stand for its quality. The fact that our bed-makers feel confident and proud when they put pen to bed frame says something about their commitment.

It says something about our quality, too. With their amazing attention to detail and sense of responsibility, your dedicated bed-maker will meticulously build your bed by hand. To us, they are more than just bed-makers. They're artists - proudly signing each masterpiece before seeing it off to fulfil its purpose in your home.
